

4/16/68

Dear Fred,

Hasty acknowledgement and thanks for your undated note and pix in envelope postmarked 4/11 at Van Nuys. It awaited me on return from very intensive and I think productive 10 days in N.O. on work with which you are not familiar. But, aside from being even more tired, I'm incredibly loaded now.

Agree on Brehm.

133A and B sound interesting.

Photo is familiar and I think is of Castillo, who I think is also very nuts.

Your projects are sound. However, you cannot check West's plots from the FBI stuff, for they are not identical.

Think I have SS photo back now. If so, will mail as soon as I can dig out.

Aerial view I used WWII inaccessible now. I got it from Penn Jones, Jr., Midlothian, Texas. Please ask him and give him my best. Tell him you are working with Steve Burton and me.

Again, excuse haste. Best to you all. You'll be getting photo help after first of month from a young friend moving there who I've already referred to Steve Burton.

Recall I asked you to forward all stuff to Garrison through me? I learned from a man who had no business knowing it what had been sent through Rose. Either Jim or Louis Ivon were totally unaware of it, but Jack Martin was and told me in detail. Please take my advice. There are, I learn from dependable outside sources, not fewer than three leaks in the office. I have arranged it so that none of my stuff goes in the regular files, which are like on TV.

Ask Steve to lean on Jaffe again. I've still not gotten anything and I've been working in that field in N.O. without knowledge of the contents of his memo. If he hasn't written it yet, there can be no excuse.

Thanks,
